Solution Design: all access control and converged systems must be ordered with the number of portals, license options and the application blades you require. If you are unsure whether the system you have selected will operate in your specific application, please check with Application Engineering (ae.lenels2@carrier.com or +1 (508) 663-2500 option 2).

Software Upgrade and Support Plans (SUSPs): All new LenelS2 NetBox access control and LenelS2 NetBox VR converged systems include software upgrade and telephone support for 12 months from the product shipment date. All new LenelS2 NetBox VRx converged systems include software upgrade and telephone support for 36 months from the product shipment date. A valid unexpired SUSP is required to add license options and cameras to an existing controller. The SUSP expiration date can be found on the About screen of your controller. SUSP pricing is based on the configuration, licensing options and camera count of your controller. Additional charges apply to renew controllers and camera licenses with expired SUSPs. Contact Customer Service to request an SUSP quote for your controller: supportquotes@carrier.com or +1 (866) 788-5095, option 3. You can also obtain a quote from the LenelS2 Portal.

### LifeSafety Power Supplies and Enclosures

LifeSafety Power (LSP) is now providing their Integrated Access Control Power Systems and Enclosures for LenelS2 installations. There are many configurations and options. If there is an exact LSP configuration you need, please provide the complete LSP part number to the LenelS2 Inside Sales Team, and LenelS2 can match it.

The standard LSP items for LenelS2 are built with a dual voltage Power Supply (either FPO75/B100 or FPO150/B100), with 120 VAC input for the standard version, and CE version has 208-230 VAC input. All distribution modules incorporate PTC technology instead of fuses. There is an option for connection of the power supply to the network for remote management and monitoring of power power and M8P. There are eight different enclosures, from a 4 door 19" rack version, to a 36x30x6.5, 8 full size panels (LNL-1320) for 16 doors enclosure. Some LSP configurations offers pre-wiring of power and communications to boards within the enclosures. If space allows, Panduit can be provided for pre-wiring, otherwise tie-wrap is generally offered. You must provide one of 4 board configurations for pre-wiring.

**The basic structure of the Lenel part number for the LSP items is:**

\* LSP-[CE option][door count]DR[network option]-[enclosure][Pre-Wire Option][Board Configuration]

\* Alternative CTX offering, with single voltage power supply, and either up to 3, 5, or 10 LNL hardware panels (6, 10 or 20 doors).

## BriefCam Analytics

The BriefCam platform is a server-based video analytics platform that offers forensic and live analytics tools. There are three main solutions that offer the ability to detect and extract objects in video, identify objects based on trained Deep Neural Networks, and classify objects to enable intelligent video analysis. The BriefCam platform also supports data aggregation and visualization. The BriefCam platform is compatible with XProtect and VRX platforms and can be viewed within the Magic Monitor client.
