LifeSafety Power Supplies and Enclosures

LifeSafety Power (LSP) is now providing their Integrated Access Control Power Systems and Enclosures for LenelS2 installations. There are many configurations and options. If there is an exact LSP configuration you need, please provide the complete LSP part number to the LenelS2 Inside Sales Team, and LenelS2 can match it.

The standard LSP items for LenelS2 are built with a dual voltage Power Supply (either FPO75/B100 or FPO150/B100), with 120 VAC input for the standard version, and CE version has 208-230 VAC input. All distribution modules incorporate PTC technology instead of fuses. There is an option for connection of the power supply to the network for remote management and monitoring of power power and M8P. There are eight different enclosures, from a 4 door 19" rack version, to a 36x30x6.5, 8 full size panels (LNL-1320) for 16 doors enclosure. Some LSP configurations offers pre-wiring of power and communications to boards within the enclosures. If space allows, Panduit can be provided for pre-wiring, otherwise tie-wrap is generally offered. You must provide one of 4 board configurations for pre-wiring.

The basic structure of the Lenel part number for the LSP items is:

* LSP-[CE option][door count]DR[network option]-[enclosure][Pre-Wire Option][Board Configuration]

* Alternative CTX offering, with single voltage power supply, and either up to 3, 5, or 10 LNL hardware panels (6, 10 or 20 doors).

There are three main solutions that offer the ability to detect and extract objects in video, identify objects based on trained Deep Neural Networks, and classify objects to enable intelligent video analysis. The BriefCam platform also supports data aggregation and visualization. The BriefCam platform is compatible with XProtect and VRX platforms and can be viewed within the Magic Monitor client.

Licensing and Software Upgrade and Support Plan Purchasing (SUSP)

If your order contains licensing or SUSP you must specify which controller the license / SUSP should be applied to. There is no need to provide this information, if there is only one controller on the purchase order.

Existing controllers must have a valid, unexpired SUSP to add any license options. If the controller was purchased on a previous order, please provide the License Identifier for the existing controller. Include the License Identifier or a screen shot from the About page of the controller with your order to ensure the license is applied to the correct controller. A valid unexpired SUSP is required to update system software, contact technical support, or add license options and cameras to an existing controller. The SUSP expiration date can be found on the About screen of your controller. SUSP pricing is based on the configuration, licensing options and camera count of your controller. Additional charges apply to renew controllers and camera licenses with expired SUSPs. Contact Inside Sales to request an SUSP quote for your controller: supportquotes@carrier.com +1 (866) 788-5095, option 3.
